

Fire Safety Law & Risk Assessment

1-day course

Aim

To give Facilities Managers the knowledge and skills required to manage the fundamental changes in Fire Safety Law which came into force on in October 2006.

Objectives

By the end of this course you will be able to describe:

The key changes in Fire Safety Law

The legal responsibilities of companies and individuals for compliance and fire safety management

The changes to the role of the fire and rescue services and the way they provide fire cover

The role of the 'responsible person in England and Wales'.

How to eliminate and mitigate fire risks, manage the use of dangerous substances, and ensure that emergency routes and exits are both adequate and available

The position of the Order in the context of the overall framework of UK fire and Health & Safety legislation including the new Fire Services Act

Suggestions for cost-effective compliance

The duty of care an organisation owes to 'Relevant Persons'

How to undertake fire risk assessments and understand how to manage fire safety.

Description

No organisation can afford to ignore the recent radical changes in Fire Safety Law which affects England and Wales.

Companies, organisations and individuals who employ staff are responsible for their own legislation compliance and management of fire safety

There have been major changes to the organisation and role of the fire service including the way the provision of fire cover and the impact of the new enforcement regime and the imposition of charging for certain non-emergency services.

Employers are now wholly responsible for ensuring that the law is complied with and directors, owners, employers and managers are personally responsible. In England and Wales, the legislation creates the new roles of 'responsible person' and 'competent person'

(Note: Scotland and Ireland have regulations which are different but broadly similar in impact. While this course will not cover the Scottish and Northern Ireland Regulations in detail, notes are provided. A one day course focused on the Scottish Regulations or the Northern Ireland Regulations can be delivered in-house upon request)

Course content
